

Thin Clients

For applications requiring a large number of clients, EOscada's implementation of Terminal Server capabilities is a good choice

- Inexpensive Computer Box - \$300 - \$500
- All applications reside on server -No hard drive
- Runs Microsoft Windows CE
- Central administration of computers, implemented on a familiar IT platform
- Parallel Printer port is available
- Just add a monitor and keyboard
- or alternately, run Remote Desktop from any Windows XP system

Full Workstation Client functionality is retained including security and A of R

- SchemaView, ListView, etc
- EOExplorer, Database Access
- Includes Remote Printing Capability
